| | Hardware Secure | \$323.25 - \$360.00 | \$347.22 |

*"Per Diem Ranges" are presented for privately-operated programs that DJS reimburses for service using a single rate. Rates are not presented for programs that are funded in whole or in part by other sources such as private health care insurance or Medicaid. IFCA and Psychiatric Hospitals are excluded as a class for this reason, and rates for in-state Residential Treatment Centers are based on 8 of 10 programs utilized by DJS during FY 2017.

**The average per diem rate should not be used to calculate the total cost by program type given the range of per diem rates. The average per diem rate does not take into account individual program utilization and the total cost may vary substantially based on the number of youth who actually participate in each program.

***Educational costs are not included in the per diem rates. Educational costs may vary within a program depending on the combination of services provided (e.g., regular education vs. special education) and the educational needs of youth placed in the program.

Appendix M separates out CD from EM, so the sum of this total will be slightly higher than the offense table totals presented on the ATD pages.

Appendix O

RELATIVE RATE INDEX (RRI)

The Relative Rate Index (RRI) is a measure of Disproportionate Minority Contact (DMC) with the juvenile justice system. It is a standardized tool for measuring how ethnic minorities compare with white youth at various contact points (court referral, diversion, etc.) The RRI was developed by the National Center for Juvenile Justice, with funding from the Office of Juvenile Justice and Delinquency Prevention (OJJDP), Office of Justice Programs, U.S. Department of Justice. For more detailed information, see: <http://www.ojjdp.gov/ojstatbb/dmcdm/asp/whatis.asp>

DEFINITIONS FOR KEY CONTACT POINTS

The definitions below describe each key contact point included in the tables that follow along with a brief explanation of each point. Understanding each contact point and how it is defined in the calculations will provide the basis for proper interpretation of the rates. Though not a 'contact point', the general youth population is included because it is a key data point for calculating the rate of contact.

| Contact Point | Definition |
|---|---|
| Population | Population of youth ages 11-17 as of July 2016. Source MD Dept. of Planning. <i>Note: DJS uses 11-17 as a population denominator due to the low number of cases under 11.</i> |
| Referrals to Juvenile Court/Intake | Juvenile complaints referred to DJS intake, from police or other sources, including delinquent & non-delinquent offenses, recorded in ASSIST. Rate is based on youth in the general population. |
| Diversion | Complaints diverted by DJS Intake, (resolved or informally adjusted to pre-court supervision), without formal petition. Rate is per referral. |
| Detention | Cases resulting in detention both pre-disposition or pending placement, but does not include youth ejected to detention from a committed placement. Rate is per referral. |
| Petitioned | Complaints resulting in juvenile court petitions. Rate is per referral. |
| Delinquent | Complaints resulting in delinquent findings. Rate is per petition. |
| Probation | Probation dispositions. Rate is per delinquent finding. |
| Confinement | Youth placed in Secure Committed program: Victor Cullen, Carter Center or staff and hardware secure private out-of-state programs. Rate is per delinquent finding. |
| Transferred | Juvenile petitions waived up to adult court. Does not include charges under original adult jurisdiction. Rate is per petition. |

RRI TABLE FOR ALL MINORITY YOUTH

The data presented here shows the RRI for minority youth compared to white youth. An RRI of 1.0 indicates no disparity at that decision point. A higher value means more disparity (higher minority over-representation), and a lesser value means under-representation. The RRI for each decision point is based on the number of youth of each race/ethnicity represented at that point compared with the number at the previous decision point.

RATES OF CONTACT FOR ALL YOUTH

This table shows the number and rate of representation for all youth, regardless of color, at each key juvenile justice decision point. The rates are based on the general population for this table, rather than based on the previous decision point.

¹ At all decision points minority youth include: African American, Asian or Pacific Islander, American Indian or Alaskan Native, Hispanic/Latino and Other/Unknown youth.

- Statistically significant results are **shaded**; Results that are not statistically significant are shown in regular font
- Insufficient number of cases for analysis are shown as **; An RRI of 1.0 indicates no disproportional contact. A rate higher than 1.0 indicates that minority youth are disproportionately over-represented at that decision point, and a rate below 1.0 shows they are under-represented.

* Data Sources: Maryland Department of Planning, Population Estimation for State of Maryland. Files used: (1) July 1, 2016 Population by Age (single year), Race, Sex and Hispanic Origin for State of Maryland; (2) July 1, 2016 Population by Age, Sex, Race and Hispanic/Latino Origin for Maryland's Jurisdictions. Available on-line: http://planning.maryland.gov/msdc/Pop_estimate/ARS/CensPopEst.shtml (accessed in July 2017).

¹The methodology for calculation of census estimates has been slightly modified for this Data Resource Guide. The proportions of age ranges 11-14 and 15-17 have been computed from the population by age (single year) and ethnicity for the State of Maryland. These proportions were then applied to estimate each Jurisdiction/County population, from the population by age (5-year age group) and ethnicity of Maryland Jurisdictions.

²Excludes Hispanic and Latino

Note: estimates with fractional values are rounded to whole numbers, therefore totals may not sum exactly.

ACCOUNTABILITY INCENTIVES MANAGEMENT (AIM)

AIM grids are designed to structure case manager decision-making when responding to positive or negative behaviors of supervised youth. The Graduated Responses grid determines an appropriate response based on the level of infraction and the level of youth supervision. Responses range from a verbal warning at the lowest level, to requesting a formal violation at the highest. This structured process supports the Department's efforts to reward positive behaviors and objectively identify and sanction violations, which reduces inequalities and increases successful completion rates among youth under supervision.
